

Roland

BK-7m

BACKING MODULE

Addendum

Thank you and congratulations on your choice of the Roland BK-7m. System version 1.05 has just been released. It introduces new functions and a few changes. If you own one of the first BK-7m units released by Roland, you can update its operating system to version 1.05. Your BK-7m may already contain system version 1.05, however.

To check which system version you have, please see the procedure below. If the display says "V1.04" (or earlier), your BK-7m needs to be updated. If the message reads "V1.05" (or higher), there is nothing you need to do, because your BK-7m is already up-to-date.

Checking the BK-7m's system version number

1. Switch on the BK-7m.
2. Press the [MENU] button.

The display changes to:

3. Rotate the [CURSOR/VALUE] dial to select "Global", then press the dial.
4. Rotate the [CURSOR/VALUE] dial to select "Utility", then press the dial.
5. Rotate the [CURSOR/VALUE] dial to select "Version Info".
Check the version number that is displayed here. (It must be "1.05".)
6. Press and hold the [EXIT] button to return to the main page.

New 'Melody Intelligent' option for the 'Pedal' and 'Pedal Controller FC-7' parameters

Pedal

The "Pedal" setting is found on the display page that can be selected using [MENU] button → "Global" → "Pedal".

After "ChordRecOff" (at the end of the table), please add:

Function	Explanation
Melody Intelligent	Allows you to control the "Switch" parameter of the "Melody Intelligent" function.

Pedal Controller FC-7

This parameter is found on the display page that can be selected using [MENU] button → "Global" → "Pedal Controller FC-7".

The following table shows the functions you can assign to each of the FC-7's footswitches. The "Melody Intelligent" option at the end is new.

FC-7 Switch	Function
1	
2	Start/Stop, Intro, Ending, Variation1,
3	Variation2, Variation3, Variation4, Bass Inversion, Arranger Hold, Arranger Chord Off, Perf. Next, Perf. Prev, Portamento,
4	Hold, Soft, Sostenuto, Track Mute, Break Mute, Reset/Start, AudioXfade, Fade Out, ChordRecOff, Melody Intelligent
5	
6	
7	

Support for MIDI Visual Control messages

The BK-7m now supports both MIDI Visual Control messages (a new standardized way of remotely controlling external video devices) and the V-LINK protocol (the precursor of MIDI Visual Control messages). Even though the messages are basically the same, MVC devices expect a SysEx code to initiate video control which is different from the one expected by V-LINK-compatible devices.

Therefore, the following parameter has been added to the BK-7m's [MENU]→ "Global"→ "Utility" submenu:

Visual Ctrl Mode	MVC, V-LINK	This parameter allows you to select the visual control mode. The option to select depends on the messages supported by the external device: MIDI Visual Control (MVC) or V-LINK.

Any reference to "V-LINK" in the owner's manual should be taken to mean "both MIDI Visual Control and V-LINK", as both are supported.

Additional Tones and Drum Sets

The BK-7m V1.05 adds 39 new oriental Tones and 2 new oriental Drum Sets to the original sound set. See the lists below.

This also means that the "Sounds" row in the "Specifications" section should now read as follows:

Sounds	1,131 tones 59 Drum Sets
--------	-----------------------------

Added Drum Sets:
